Professional Summary

Detail-oriented software testing Specialist and a strong foundation in QA principles. I am skilled in executing test cases, identifying defects, and ensuring software meets user requirements. Actively building expertise in automated testing, API validation, and improving testing workflows to enhance software reliability and user experience.

- El-Sherouk Academy
Bachelor's degree in computer science

2015 – 2019

Professional Experience

Abu Dhabi Islamic Bank
senior Software Tester

November 2025 - Present

- Design, execute, and maintain manual test cases based on business and functional requirements.
- Perform API Testing using Postman, validating requests, responses, status codes, and business logic.
- Execute Functional, Regression, Smoke, and Sanity Testing across web and mobile applications.
- Perform Post-Deployment Verification (Production Validation) to ensure successful releases and system stability.
- Report, track, and verify defects using Jira, collaborating with development teams until resolution.
- Participate in requirement analysis, test planning, and release validation.
- Work closely with cross-functional teams to ensure software quality throughout the SDLC.

Al Ahly Momkn for e-payment
Software Tester

October 2023 – October 2025

- Performed manual and functional testing to ensure system features meet business and user requirements.
- Create Comprehensive Test Case Documents: Develop and document detailed test scenarios to ensure full functionality coverage.
- Support User Acceptance Testing (UAT) to support final validation before production release.
- Cross-functional Collaboration: Worked with teams to align operational goals and resolve client issues.
- Identify, document, and report bugs and issues using Jira
- Propose improvements to enhance testing efficiency and overall product quality.

Fawry for online payment

Technical & Business Operations Executive

January 2022 - September 2023

- User Acceptance Testing (UAT): Conducted UAT processes and documented testcases.
- issue Analysis: Investigated and identified root causes of issues.
- Service Configuration: Configured new services for integration into Fawry's platform

Skills

- **Testing & Automation:** Experienced in Manual Testing, API Testing using Postman, Web Test Automation using Selenium and Playwright, and Mobile Test Automation using Appium. Skilled in Functional, Regression, Smoke, Sanity, Integration, and End-to-End Testing.
- **API Testing:** Proficient in testing REST APIs using Postman, including request/response validation, authentication, HTTP status codes, and business logic verification.
- **Programming Languages:** Working knowledge of Java, Python, and JavaScript/TypeScript for test automation, scripting, and debugging.
- **Database Testing:** Experienced in validating backend data using PostgreSQL, MySQL, SQLite, and Oracle.
- **Version Control & Collaboration:** Proficient in Git and GitHub for version control and collaboration on automation frameworks.
- **Project Management & Defect Tracking:** Experienced in Jira for defect tracking, test execution, sprint planning, and Agile collaboration.
- **SDLC & STLC:** Strong understanding of the Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), test planning, test case design, defect lifecycle, and QA best practices.
- **Release & Production Validation:** Experienced in post-deployment verification, production validation, release testing, and ensuring application stability and quality after deployment.
- **CI/CD:** Familiar with CI/CD pipelines and GitHub Actions, with an understanding of integrating automated test suites into continuous integration and continuous deployment workflows.

Projects

- **POS (Point of Sale) Testing:** Performed end-to-end testing for POS systems, validating payment transactions, integrations, and business workflows.
- **Two-Pool Balance Transfer:** Tested POS-based balance transfers between merchant accounts, validating balance availability, debit/credit accuracy, transaction status, and negative scenarios.
- **Egyptian Railway Ticketing:** Tested end-to-end railway ticket reservation and payment through POS terminals, validating booking, payment processing, transaction results, and error scenarios.
- **FinTech Mobile Application Testing:** Performed functional, regression, API, and end-to-end testing for a FinTech mobile application supporting bill payment services.
- **Web Portal Testing:** Tested web-based administration and configuration portals, validating system configurations, user management, and business workflows.
- **Consumer Finance Mobile Application Testing:** Performed functional, integration, regression, and user acceptance testing for a consumer finance mobile application.
- **Test Automation:** Developed and maintained automated test scripts using Selenium, Playwright, and Appium for web and mobile applications.
- **API Testing:** Designed and executed API test collections using Postman to validate RESTful services, authentication, business logic, and response integrity.
- **Backend Development (Django):** Developed backend applications and RESTful APIs using Django and Django REST Framework (DRF), implementing authentication, CRUD operations, serializers, database models, and API endpoints.
- **Personal Projects:** Blog Management System: Developed a full-stack blog management system using Django and PostgreSQL with authentication and content management features.
Cinema Ticket Booking API: Developed a RESTful API using Django REST Framework for cinema ticket booking, including authentication, serializers, and CRUD operations.
